EDUCATION

Full Stack Software Developer,

Coder Foundry

January 2023 – March 2023 | Kernersville, NC

Bachelors of Science in Game Design,

Full Sail University

January 2012 – August 2014 | Winter Park, FL

Graduated with Honors(Valedictorian)

PROFESSIONAL EXPERIENCE

Software Developer, CDS

July 2023 – present | Mechanicsburg, PA

- I support five enterprise applications: four in VB.NET and one in Xamarin.
- Responsible for bug fixes, and new features.
- Built platform-specific location services that interface with our core location service built using the Google Maps API that monitors a users location when using the app and provides nearby event information.

Full Stack Web Developer, Coder Foundry

January 2023 – March 2023 | Kernersville, NC

- Built IN_Tracker, a fully functional multi-tenant bug tracking software that allows managers to track projects and their associated trouble tickets throughout a products lifecycle. This was built using ASP.NET Core, MVC, and PostgreSQL.
- Built Code it, a blog platform using ASP.NET Core, MVC, and PostgreSQL. I implemented role based security using the Microsoft Entity Framework, a search feature, and email service to notify registered users when a new blog had been posted. An API was also built for this, allowing me to push recent posts to my portfolio.
- Created Keep In Touch, a full featured contact/customer management solution using ASP.NET Core, MVC, and PostgreSQL. This app allows individual users to store contacts, search for individual contacts, or filter a list of contacts based on a given category. The user then has the option to email an individual or a category/group of contacts.

Account Manager, Clipper Magazine

2015 – 2022 | Hempfield, PA

- Manage 130 client mobile apps and print marketing over a variety of industries.
- Train clients on how to use their apps, and troubleshoot any problems they may have had.
- Advise customers and work with the art team to produce highly effective print marketing.
- Built an automated client reporting system using VBA and Mail Merge, saving roughly 600 production hours a month.
